

RUBE GOLDBERG MACHINE PLANNING WORKSHEET

Ready to start building your machine? Lets start by getting ideas together!
Planning out your machine will help you have a successful build.

GOAL: What are you trying to accomplish? Think of something simple such as knocking over a cup, hitting a light switch or flipping something. Remember, a Rube Goldberg Machine completes a simple task!

What materials do you have?: A large, complex Rube Goldberg Machine is made up of many smaller systems. All the small systems cause a chain reaction to accomplish your goal! But before we can start building, look around your house and see what materials you can use. What are some materials you think might work well for your machine?
